A Time For Careful Thought

Unless he formulates and follows a new economics it is only a question of time until the farmer as a self-respecting freeman will take his place in the museum of vanished types. In this new economics the principles of co-operative action will play a decisive role.

If the farmer is to cease being the beaten and buffeted victim of modern industrial civilization, if he is to become master of his own economic and cultural destiny, he must organize as the rest of economic Canada has organized. If he does not he will be lost in the shuffle.

The Alberta Pool Elevators represent the foremost step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that this Alberta co-operative organization is assured the greatest possible measure of success.

School Re-opens for Fall Term, Thursday September 1

Oyen public and high schools re-open for the fall term, Thursday, September 1. The teaching staff will be the same as last year.

M. D. Bertawan

The council of the Municipal District of Bertawan, met in Sibbald on Saturday, August 13, at 8 p.m., the following members being present: Reeve Mowbray, Councillors Meade, Musser, Stauffer and Wilson.

An officer of the Salvation Army waited on the council, to solicit a donation for the home for unmarried mothers. Moved Stauffer: That we donate \$50.00 to be paid at a later date.

Amendment, Wilson: That we table the matter until the November meeting. The amendment carried.

The secretary was instructed to communicate with Nurse McLean with reference to her account.

Moved, Stauffer: That we appoint E. J. Norris bailiff at the rate of \$1.00 per day and 8 cents per mile, for every day employed. Carried.

Accounts were presented and passed for payment.

EXCEL NEWS

Mr. E. T. Cook of the Department of Health, gave an illustrated lecture on "Health", in Excel school on August 11, to a large audience. The pictures shown were especially adapted to impress on children the ordinary rules of health.

Mr. W. B. Kirkpatrick of Calgary was in Excel district this week, renewing acquaintances and looking after his farming interests.

Mr. Geo. D. MacMillan left last Monday for the coast, for a two-weeks holiday. Mrs. MacMillan and children who have been there several weeks, will return to Excel with him.

Mr. Charles Gilbertson was the first farmer in this district to deliver this season's wheat in Excel. Grown on stubble and harvested by combine, it averaged fifteen bushels to the acre, and was graded No. 1, at the Searle Grain Company's elevator.

Complete Organization

United Grain Growers operates more than 450 elevators in western Canada. Great terminal elevators are operated at Port Arthur and Vancouver. Export offices are maintained at Vancouver and New York.

The complete organization of this company, its highly trained staff, its constant contacts with all the markets where Canadian grain is sold, and its financial strength, all contribute to its ability to give good service to western farmers in handling their business.

Help Our Youth Now

Within recent weeks daily newspapers throughout the Dominion have printed columns, and sometimes solid pages, of names of young men and women who have graduated from universities and colleges or passed the final examinations of their Normal, technical, collegiate, high school or business college courses. The total number of these young people in Canada runs away up in the thousands every year, and last year and again this year has been no exception.

In the case of the University and college graduates they have, with a few exceptions who will go on with post-graduate work, come to the end of one phase of life. The same is true of the vast majority of those who have completed Normal, technical, collegiate, high school, and business college courses. A certain number of these will go to university, or take up some special course of further training, but generally speaking, these students have ended the days of their scholastic preparation for life.

In a word, this great army of youth, who in their teens and early twenties have been studying and undergoing training, has completed this first stage in life's journey. They have been preparing for work. They are now ready to go to work, and are eager to begin, bubbling over with enthusiasm and keyed up with energy for the work ahead, and stirred with ideas and ambitions of what they expect and desire to accomplish.

And right at the onset they are met with a wall, with crushing disappointment. In an overwhelming majority of cases there is no work for them to do, no positions open for them to fill, no opportunities knocking at the door to which they can respond. True, there is the odd case where through family or other influence a position is made available, but, by and large, inability to secure work is the experience of this army of today's youth, trained, eager and ready to work. They find themselves in a world which offers them little or no opportunity to use their hard won knowledge and training.

Herein lies the greatest tragedy of present day conditions, herein lies to be found the greatest menace not only to the future lives and usefulness of these young people, but to the future of our country. At the close of one period in their lives, they are confronted with a blank wall; they cannot retrace their steps, they cannot go forward. What are they to do except "mark time" for the present, and, while marking time, what is to be effect on their enthusiasm, their energy and initiative, their ambitions—in a word, on their character? They must wait, and these opportunities which during this trying period of enforced idleness, are they going to develop habits of shiftness, slip into evil ways, weaken morally? It is clear, straight thinking developed in their student days to become twisted, and the strong anchorage deeply imbedded in the wisdom and experience of the past which have been instilled in them to be uprooted?

These are questions to be answered not only by present-day youth, but by the more adult generation. The elders of today have survived other hardships, other panics and crises, and they know that the evils of today will be overcome and pass away. They have confidence that there are just as good, even better days ahead; that the future holds just as great opportunities for them, than the past, and that these opportunities will come to the youth of today as they came to them. But youth, lacking the experience, is not sure of this. It has its golden visions of immediate activity and usefulness in the world of work dimmed, if not shattered. They are hurt and bewildered. They are not at all sure of the future, and are in a questioning state of mind. They do not know where to turn. Parents and friends are absorbed in their own difficulties, worried and apt to be impatient.

The elders of this generation require to develop an understanding of their children's problems and present outlook on life, to reveal to them a deep sympathy, and to cultivate a dispassionate patience. Parents can, perhaps, do more in these days to make or break the future lives of their children than in any other years.

And what is true of the parents is likewise true of those who are the leaders of and responsible for the life and activities of the communities in which they live. Youth must be served, and if active remunerative employment for a time cannot be provided, an outlet for their energies and enthusiasms, then other provision must be made.

Students of the problem confronting youth at present suggest two forms of activity for them in the absence of other employment. One, that in each and every community adequate means and forms of recreation be provided to engage the interest of and provide an outlet for the energies of youth. In all departments of sport, in properly supervised dances, in the organization of orchestras, glee and drama societies, debating societies, in libraries containing books on inventions, explorations, etc.

Second, in the arousing and developing of an interest among young people in the welfare of the community in which they live. If remunerative occupation cannot be provided for the youth of the community, give them the opportunity to serve themselves through some form of recreation and to serve others and the community at large until the opportunity to realize their ambitions returns. The elders of the community can develop such programmes—there is a need, and probably more so now than ever before—and by the application of the enthusiasm and energy of youth they can be carried through. It will keep them out of mischief, and give them something to think about besides their own problems. Instead of becoming narrow, selfish and bitter, such an interest will broaden their outlook and such activities will sweeten their lives. They will discover much to be thankful for; that in many ways they are not so badly off after all; hope will be revived, confidence restored, new, and possibly better conditions aroused.

Out in the cattle country according to a Western paper, it is not unusual to see a \$50 saddle on a \$15 broncho. Huh! Around here we're always running into—or being run into by—\$3 cars wearing \$15 licenses.

"Look here, waiter, I've been waiting half an hour for that steak I ordered."

"Yes, sir, I know sir. Life would be worth living if everybody was as patient as you are."

Suffered A Severe Attack Of Dysentery

Mr. P. L. D. Moulton, Vernon, B.C., writes:—"Last night I suffered from a severe attack of dysentery. I tried nearly everything on the market, without any relief, until a friend told me to use Dr. Fowler's Kidney and Bladder Pills. I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest. "While Strawberry is sure relief for dysentery, colic, diarrhoea, and I always see I get the genuine 'Dr. Fowler's'."

The Coming Motor Car

New Models Show Trend Toward Stream-Line Appearance

The automobiles of the future will look more and more like one another, we are told in an informative article by T. R. Elliott in Macdonald's Magazine. This will not surprise the close observer of this year's models for a tendency in this direction is already apparent. However cars may differ in other respects—in materials, appointments or power—their appearance will conform to the stream-line. They will adopt, Mr. Elliott says, a shape very much like that of a teardrop rolling down the cheek. It is the shape of the raindrop, the bird and the fish. Man, having experienced has found that nature was right, after all. The great advantage of the teardrop shape is in the saving of power. It is said that at 100 miles an hour the teardrop uses about ten horse-power as against the 20 used by the ordinary sedan. It means a saving not only in gasoline but in engine construction. Automobiles should tend to become cheaper and more economical to operate. There are other improvements along the highway that leads to the "perfect" car. One of them is suspected to be the super-balloon tire. Others have to do with materials, lubrication and engine design. The last word in automobiles has not yet been uttered. The industry has an interesting future.

WHOLE FAMILY WITH INDIGENOUS

A mother of four writes:—"Myself and family of four all seemed to suffer from acidity, pains in the back, and general nervousness. I was taking whatever I ate. But since we have been taking Kruschen (for the last three months) we are all feeling better and all enjoy our food much better. We never have a true headache again. I now say, 'I think it is wonderful!—It has no equal in the world. Whatever we may have to go without, we can give up Kruschen.' (Mrs. J. M. Kruschen) has been taking Kruschen for many years. It is a natural, pure and invigorated blood purifier. It is a natural, pure and invigorated blood purifier. It is a natural, pure and invigorated blood purifier. You'll feel wonderfully energetic and, as healthy and hearty as it is humanly possible to be."

Food Prices Decline

Cost Of Food Half Of What It Was In 1921

Cost of food today over the store counter is considerably less than half what it was in 1921, and has shown a marked decline since 1929, a report issued by the Dominion Bureau of Statistics shows. The index number of the Dominion Bureau of Statistics for food in 1911 years ago stood at 141.1; in 1929 it was 101, slightly over the base of 100 in 1926, and in July this year it was 61.4, a drop of 80 per cent in three years.

The index number of clothing, fuel and rents has also declined, and of the whole the change in the cost of living is shown by a drop in the total from 99.9 in 1929 to 60.8 last month.

Practically every item of food shows reductions, including meats, butter, milk, bread, sugar, coffee and tea. Vinegar is a lone stand-out, showing little change. It is 7.5 cents per pint in 1929. Today it is 7.5 cents.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs as the attack is taken over, and it becomes a dreary existence. And yet it is needless. Dr. J. C. Remedy has brought a new asthma to an army of sufferers. It is a simple, restricted, safe, and effective guard against future trouble. Try it.

Using Canadian Ports Canadian ports are being used by Canadian shippers to a greater extent than they possibly ever before, and the routing of the Dominion's grain to the United Kingdom via the all-Canada route is increasing. Formerly, United States ports got the bulk of Canadian grain for shipment overseas, but this situation has been changed in the past year.

"The modern girl is not being an animated doll," declares a novelist. "She must admit, however, that she doesn't call 'Mamma' when she is squeaked."

Made by Janarius Galliano, in Naples, in 1745, a violinello was sold in London recently for \$1,250.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and safely with Douglas' Egyptian Liniment.

Bidding For Tourist Trade

Canada Can Draw Business By Advertising Pleasure Resorts

Tourists in Canada, 1931, spent \$207,280,000, Canadian tourists abroad spent \$113,292,000, Canada's net debt to tourists was \$165,946,000. That is a lot of money, and that is a lot of tourists. The fact that so many had come to Ontario and Quebec which got the major portion of it are to be congratulated. The successful harvest of their advertising. Canada's balance in tourist trade is so much greater than her balance of trade in commodities that catering to tourists looks almost like a Wallingford scheme for the rapid accumulation of wealth.

Saskatchewan is the latest province to make a bid for the trade of travellers. Previous to the opening of the Prince Albert National Park, Saskatchewan was stricken with a poverty of playgrounds, and had not the sight of the waving seas of what to offer as an inducement to vacationists. However, she has boomed the name of the park by catering to motorists from the south, one from Montana and the other from the state as far south as Colorado adjacent to U.S. highway 85. The second party included the governors of North Dakota, South Dakota and Wyoming, and it is slated as an annual affair to arouse and maintain interest in what is termed "the international highway of three nations," with Prince Albert National Park at one end and Mexico at the other. Edmonton Journal.

Revenue From Radio

Receipts From Radio Licenses Exceed One Million Dollars

Receipts from radio receiving licenses this fiscal year already exceed \$1,000,000. This means 500,000 owners of sets have taken out licenses. This is said to be about half of those owning sets. It had been planned to prosecute those who did not take out licenses voluntarily but it has been decided to first make a house to house canvass. Commander C. P. Edwards will have charge of organizing this nationwide undertaking.

Many infants are infected by worms which cause great suffering. They are usually dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Engineers of 13 countries are meeting in Milan, Italy, to confer on international uniform standards for airplane and automobile parts and other articles.

Mechanical household refrigerators are taking the place of the traditional cooling cellars in apartments in Belgium.

Canada Now Importing

Raisins From Australia

Supply Formerly Came From United States and Spain "Have you had your raisin today?" That is what the raisins people used to shout at us some years ago, and those of us who heeded, and thought we needed them, promptly went out and bought raisins that came from Spain or the U.S.A. It is different today. We've begun to mix importation (not the old sort) with our iron, have started to buy our raisins from South Africa and Australia, indeed, is now sending us more raisins than we get from across the line.

Under the new trade treaty importation of Australian raisins has increased from 4,096,098 pounds in the first six months of 1931 to 4,489,509 in the same period of 1932. In the year of 1931 we imported 8,291,732 pounds from the United States, but the import has declined this year to 5,622,603.

The last three months demonstrate very clearly the efforts which Australia is making to capture the raisin trade. The amount imported from Australia has been 4,291,600 pounds as compared with 2,391,352 from the United States.

Incidentally, all of us who are preaching the need for and benefits of trade within the Empire can help along the good work by "having raisins."—Ottawa Journal.

A Corrobor of Pulmonary Trouble.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Mystery V.C. Holder

How Commander Agar Won Coveted Victoria Cross Was Never Revealed

Commander Agar, who is with H.M.S. Scarborough in the West Indies, and who was gravely hurt to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes. Agar made his raid on the "Olig" in a small motor boat, ran the gauntlet of Russian destroyers and heavy fortress guns, repaired damages to his craft while under fire, and made off with a haul of commandeered from a Russian fishing boat.

Protect the child from the ravages of worms by using Mother Gray's Worm Expeller. It is a standard health-giving remedy of use have enhanced its reputation.

Old Coin Survives Fire

Was Imbedded In Silver Of Others That Melted

A coin 133 years old, dated A.D. 799, has been found at Corning, Illinois, among the possessions of Jake Bittner. Mr. Bittner's father was a coin collector, but when his home burned the coins were melted. The metal was thrown in a trunk. Dug out recently with an eye toward selling the silver metal, the dealer revealed one coin imbedded in the silver. Made of copper, it had not melted.

An analyst has found iron filings in tea, chalk in custard powder, and zinc in mace. Fired by his success, he is now bent on discovering pork in pork-and-beans.

The Amsterdam-Paris air line has installed flying telegraph offices for the use of its passengers.

A Prime Favourite

Men who "roll their own" have made Ogden's fine cut cigarette tobacco a favourite. It makes better cigarettes more quickly—this brand has always sold on its merits.

Free "Cigarette" cigarette papers with every package.

OGDEN'S FINE CUT CIGARETTE TOBACCO

Erect Higher Buildings

Permission Granted To Construct Buildings in London To Height Of 100 Feet

An upsurge in the height of buildings permitted to be constructed in London has been allowed by the County Council. Henceforth structures may rise to a height of 100 feet. The previous limit was 80 feet. Risk of fire has been the principal factor in limiting the upward extent of London's buildings, but under present methods of steel construction the risk is considerably lessened. It is doubtful, however, whether the sub-soil would bear structures of skyscraper proportions, though heights of 200 feet are anticipated.

"It wish my wife would not live beyond our means."

"Why does she do it?"

"Just to impress the neighbors who live beyond their means just to impress us."

Bilious For Days At Time Until She Took Vegetable Pills

Gratefully, Mrs. C. writes: "The first dose of your wonderful Carter's Little Vegetable Pills cured me of my biliousness after every medicine I tried failed." Because they are PURELY VEGETABLE, gentle, effective, tend to both lax and bowels. Dr. Carter's Little Vegetable Pills are sold by all druggists. Ask for Carter's by NAME.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it is actually dust—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft paper pulp, treated in a scientific way with a high-grade furniture polish; and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surface requiring attention. Then when one sheet is soiled or worn, turn the Wonder Paper inside out. After you have given a quick wipe, leaving fresh to furniture and woodwork, you can still use Wonder Paper on the floor, if you wish.

And when you are through, there's no old dust to shake out or wash. Throw away the Wonder Paper and you have completed the most tiresome part of the housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Great West.

Special Offer Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If your house is well-stocked, you can still use Wonder Paper on the floor, if you wish.

Appleford Paper Products, Ltd., Hamilton, Ontario. Enclosed for the trial of which please send me one full-size package of Wonder Paper and your 100 recipes we "Lick-o-ver."

WORLD HAPPENINGS
BRIEFLY TOLD

The will of the late King C. Gillette, safety razor manufacturer, naming his widow as the sole beneficiary was probated at Los Angeles. Attorneys said the estate would be in excess of \$1,000,000.

Believed to be the last survivor of the fifth regiment, which took part in the Riel Rebellion at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Vasey Headon, 86, is dead at Lachine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1931-32 season has been made by the Alberta wheat pool. It was announced by R. D. Purdy, general manager. Total payment amounted approximately to \$200,000.

Automobiles on farms in Canada have doubled in the past ten years and there is now a car for every 2.27 farms, figures issued by the Dominion Bureau of Statistics show. There are 728,632 farms in the Dominion and on them 821,800 automobiles.

There are 5,851,411 single persons in Canada and 3,971,198 married. It is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,576,786, males number 5,374,431 and females 5,202,355.

Preserving Fish By
Brine-Freezing Method

Process Used In Scotland Has Been Gratifying Success

Brine-freezing, a new method of preserving fish caught in the sea, the result of research work carried out at the Torry Research Station, Aberdeen, is regarded as a gratifying success and an exhibition of cod, sole, halibut, plaice and rock salmon frozen by this process was given recently at the Department of Scientific and Industrial Research, London.

The fish had been caught by the research vessel "City of Edinburgh" weeks previously. The fish were frozen at the department and guests enjoyed an early luncheon of fried fish at the government's expense.

This new process will, it is claimed, revolutionize the methods of preserving fish. Trawlers will brine-freeze fish as they are caught instead of, as at present, storing them in ice while the trawler is at sea. A. Lumley, superintendent of the Torry Station, said that one of the disadvantages of fish frozen under old methods had been that it was not ultimately nice to eat.

In the brine-freezing process the fish are dipped into a solution of sodium chloride (or brine) carried on board in a tank at a temperature of five degrees Fahrenheit. Then they are stored at a temperature of five degrees, and experiments have shown that fish so treated can be kept in perfect condition for three months.

The cost of installing the new plant on board is about \$5,000, but it is claimed there would be a real saving, because of the avoidance of loss on fish caught early in the voyage. A. Billingsgate fish merchant says the brine-frozen fish was almost as good as freshly caught fish.

Lacked Vision

Hotel Proprietor—"Now, over there is the sea."

Copy Writer—"Where I can't see it."

Hotel Proprietor—"You can't." My dear sir, I'm afraid you're not the man we want to write our advertisements."

Another Scotchman died as a result of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

"What would you like, sir?"
"One lemonade—and three straws."
—Buen Humor, Madrid.

W. N. U. 1006

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lowly lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway.

"Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now are second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 10,000 cases and was valued at \$200,000.

Novel Use For 'Planes

Japanese Army Machines Search For Active Volcano

Japanese army 'planes' were put to the novel use of scouting for an active volcano. Reports came to Harbin that an extinct volcano in the Hinggan range in the west had suddenly become active. Rumblings were reported as heard in a place 25 miles away from Harbin. The 'planes' failed to locate any evidence of eruption. Russian scientists reported 13 volcanoes in the Hinggan range back in the 18th century.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes, and providing its drivers' milk bottle baskets with rubber shock-absorbers, it plans to locate any evidence of eruption.

A necropolis is a burial ground, usually of great size, or one found near the site of an ancient city.

A Big Cargo

Lake Vessel Carries Enough Wheat To Bake 12,500,000 Loaves

An old salt sat on the bank of the new Welland Canal. Beside him sat the statistician. Talk veered uncertainly from one subject to another. Then it reached record cargoes. "And the statistician got busy."

When the "Lemoyne" opened the canal, she carried the world's greatest cargo of grain, he said. "She has already carried 571,885 bushels of wheat at one load, and that cargo would make 12,500,000 two-pound loaves of bread. If you laid those loaves end to end they would reach 2,800 miles from the distance from spot where the wheat was produced to the sea. It would take 210 farms of 10 acres to grow the cargo and 260,000 railroad cars, or a train 2½ miles long to carry it."

"Well," said the old salt, tapping his pipe reflectively against the smoking post, "that's quite a load. I remember when the first steamboat—'Theorin'—pulled out of Port Arthur with her record cargo. It was 30,000 bushels."

Britain Perfects Super-Tanks

Much Stronger and More Efficient Than Old Type

Great Britain was the first nation to use "tanks" in warfare. Since then these instruments of destruction have been greatly improved so that England leads the world in such weapons. The latest tanks are covered with armor plate much stronger than that of the old-type tanks. They are also perfected a more mobile light tank capable of negotiating ditches, streams, trenches and other gaps much wider than its predecessors could have negotiated.

What It Stood For

A tiny butcher shop recently opened in a Connecticut town, wedged into a small store room, bears the impressive firm name of Williams & Gilchrist, Ltd. Asked what the Ltd. stood for, "Stand for 'united,'" Mr. Gilchrist said. "You see, we're limited to meats and nothing but meats."

"What is a paradox, Mister?"
"Two wharfs side by side, sir."

Utilize White Whales

Hides May Be Used For Manufacture Of Fancy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoirs and they provided 35 per cent. of their total weight in excellent quality oil, bearing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time, but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Hubber almost two inches thick adheres to the hide, but comes off readily.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin bracelet to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ullrich, late of the Kaiser's army, sent the trinket from his death-bed and with it this note: "Before I will have to die, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life to 1918."

"I therefore lay in your hands a bracelet made out of old German coins as a sign of appreciation for a nation whose soldiers even in war treated their enemies with great consideration."

Artificial Lighting

For Office Buildings Would Provide Uniform Glow Which Is Easier On Eye

Some authorities on illumination contend that the office buildings of the future will be built without windows and will employ artificial lighting throughout, in an effort to secure a uniform glow which will not tire the eyes. An instrument has been invented which tests accurately the effect of various lights on the eyes.

SUNDAY SCHOOL LESSON

AUGUST 28

GIFTS FOR BUILDING THE TABERNACLE

Golden Text: "Honor Jehovah with thy substance, and with the first-fruits of all thine increase."—Proverbs 3:5.

Let each student recite to 88.7.

Devotional Reading: Psalm 84, 2, 8-12.

Explanations and Comments

The Call For Contributions For the Sanctuary, Exodus 35:20. Moses assembled the people and addressed them, probably from a raised platform. He reminded them that it was God's desire to have a sanctuary where He might meet them and they might offer Him their worship. He called for voluntary contributions of materials and labor for the sanctuary and its equipment and for the vestments of the priests. There was one restriction, the givers of gifts must be "willing-hearted," and the laborers "wise-hearted." The people listened quietly and went to their homes.

"You might have wondered why I have not said that you must have had been able to touch their emotions and arouse their enthusiasm. How different this seems to the methods in use today to extract money from reluctant hands."

"An Old Subscription List," verses 21-29. This heading is the happy title which Dr. Alexander MacLaren gives to his exposition of this chapter. Let each man do according as his heart prospered in his heart, wrote Paul to the Corinthians, "not grudgingly or of necessity, for God loveth a cheerful giver." The men and women on this old subscription list fulfilled that injunction of Paul's. They came, a great crowd of willing givers, "every one whose heart stirred him up, and every one whom his spirit made willing," laden with gifts needed for the building of God's house and for "the holy garments," the garments consecrated for use in the sanctuary.

The word asks, "How much does he give?" Christ asks, "Why does he give?"—John R. Mott.

They were refugees. They were living in the wilderness, where there were no workshops. Materials for the tabernacle must come from their private hoards. From Exodus 12:35, 36 we learn that the children of Israel on leaving Egypt asked of the Egyptians "jewels of silver and jewels of gold, and raiment; and Jehovah gave the people favor in the sight of the Egyptians, so that they let them have what they asked, and they despoiled the Egyptians." These treasures now the people poured out for Jehovah's use. Every gift was a sacrifice. It could not be replaced.

There are 121 languages spoken by the 461,000,000 inhabitants of Europe.

Wool Trade

Two-Thirds Of The World's Wool Produced In British Empire

Nearly one-half of the world's raw wool, a survey by the Empire Marketing Board shows, and more than two-thirds of the wool entering world trade is produced within the British Empire.

Concerning Canadian production, the survey, a portly volume of 200 pages, says that appreciable progress has been made since 1914, though the high point reached just after the war has not since been attained. The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire.

The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire.

Recipes For This Week

(By Betty Barclay)

PIN WHEEL BISCUITS

2 cups special cake flour, sifted.
4 teaspoons baking powder.
½ teaspoon salt.
4 tablespoons butter or other shortening.

½ cup milk.
4 tablespoons butter, creamed.
½ cup brown sugar.

½ cup pecan nuts, chopped.
Sift flour once, measure, add baking powder and salt, and sift again.

Cut in shortening. Add milk gradually until soft dough is formed. Roll ¼ inch thick on slightly floured board. Spread with creamed butter; sprinkle with brown sugar and nuts. Roll as for jelly roll and cut in 1-inch pieces. Place in greased muffin pans cut-side up. Bake in moderate oven 275 degrees Fahrenheit 35 minutes. Makes 12 biscuits.

ORANGE BLANC MANGE

(Serves 6-8)

1½ cups evaporated milk.
½ cup sugar.
1½ teaspoon salt.
1½ tablespoons cornstarch.
1½ cups orange juice.

1 teaspoon grated orange rind.
Beat milk and sugar. Mix sugar, salt and cornstarch. Blend with part of orange juice. Add with remaining juice to hot milk. Add grated rind. Cook until smooth, stirring frequently. If orange juice curdles milk, beat with white type beater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Settlement Plan

Shakabachwa Families Taking Advantage Of Government Scheme

Out of 507 families approved for the Shakabachwa Government land settlement scheme a total of 318 had actually gone to farms up to August 6, according to a statement issued recently.

Further classification of this number showed that 125 families had taken up residence on purchased land and 193 on homesteaded lands.

Figures for the cities were: Regina, number approved 136, actually gone 85; Saskatoon, number approved 298, actually gone 172; Moose Jaw, number approved 73, actually gone 58.

Origin of other families included in the settlement movement were: Arco, 1; Yorkton, 1; Estevan, 10; Custer, 1; Indian Head, 1; Edenwold, 1; Vonda, 1; Sutherland, 4; Wynburn, 8; Gravelbourg, 1.

Trials Of A Newspaper

The following item appeared in The Journal, Bates County, Georgia: "We done a good business Saturday. Junked type that cost 50, put in \$60 worth of new type and collected \$1 subscription. We tried 'em on corn last week, but had little success. This week we call for peanuts on subscription. This is as far as we are going. Don't want any hickory nuts."

An unwelcome guest is one of the best things going.

"Can't you give me drink for my sake?"
"Who said I drank for your sake?"

NEW DEEP WATER ROUTE FOR WESTERN WHEAT
Most fittingly, the vital new link in the Great Lakes' system, Canada's \$200,000,000 new Welland Canal, was opened, officially, by sending the greatest grain-carrier afloat, S.S. Lemoyne of Canada Steamship Lines, through the eight locks to Kingston with the biggest cargo of western wheat moved

OPENED BY WORLD'S GREATEST GRAIN VESSEL

in two years, a load of grain over 150,000 bushels greater than had ever been shipped through the lower lakes in history. The Governor-General, delegates to the Imperial Conference, Rt. Hon. R. B. Bennett and members of the Cabinet all attended the opening ceremonies at Thorold.

Photos shown: top left: Rt. Hon. Stanley Bruce, of Australia; Rt. Hon. Stanley Baldwin; His Excellency, Earl Bessborough, and Rt. Hon. R. B. Bennett with two members of the Indian delegation at the canal ceremonies. Left centre: the giant 635-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right centre: marking the inauguration of a new eastern deep-water terminus for grain at Kingston and the fact that only 200 miles of river navigation now remain to reach the export port of

Montreal.—Mayor G. C. Wright, of Kingston, conferring the freedom of the city on W. H. Coverdale, president of Canada Steamship Lines at the ceremony on arrival. Bottom: "The practical consummation" of the ceremony.—S.S. Lemoyne prepares to unload her cargo of 532,000 bushels, shipped by James Richardson & Sons, of Winnipeg, at Kingston's new elevator which has already, for 1932, handled 4,000,000 more bushels than it did in the whole of the preceding year.—All photographs by Canada Steamship Lines.

"Can't you give me drink for my sake?"
"Who said I drank for your sake?"
—All for Alls, Stockholm.

"WOMEN CAN BE CHARMING AT ALMOST ANY AGE"

says Frances Starr

"Of course I am 30," says Frances Starr, famous stage and screen star. "You must not so little nowadays if a woman knows how to guard complexion loveliness."

"Every actress knows that regular use of this Turret brand will do wonders for her skin. I use it regularly."

Of the 694 important Hollywood actresses, including all stars, 680 use this famous white soap. You will want to try it—at just 10¢ a cake!

"It's 30—"

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET FEEDER
"The Splendid 30," "The Herald"
Hedder & Strout, Ltd., London

CHAPTER XXIX.—Continued.

And Jean found herself resting against the curve of Blaise's arm, with the roars of powerful shoulders, firm and solid as a battle-bench.

"All right!" queried Blaise, gathering up the reins in his left hand. "Lean well back against my shoulder. There, how's that?"

"It's like an arm-chair."

He laughed.

"I am afraid you won't say the same by the end of the journey," he commented ruefully.

But by the end of the journey Jean was fast asleep. She had "leaned well back" as directed, conscious, as she felt the firm clasp of Blaise's arm, of a supreme sense of security and well-being. The reaction from the strain of the afternoon, the exhaustion consequent upon her fight through the mist and the fall which had so suddenly ended it, and the rhythmic beat of Orion's hoofs all combined to lull her into a state of delicious drowsiness.

"It was so good to feel that she need fight, and scheme, and plan no longer, to feel—"

Blaise was holding her. . . .

Her head fell back against his shoulder, her eyes closed, and the next thing of which she was conscious was of being lifted down by a pair of strong arms and of a confused murmur of voices from amongst which she hastily distinguished Lady Anne's heartily: "Thank God you've found her!" And then, characteristically practical, "I'll have her in bed in five minutes. Handkerchiefs and hot-water bottles are all in readiness."

It was the evening of the following day, Jean, tucked up on a couch and with her strained neck comfortably handaged, had been rehearsing the finishing blash with the particulars of her experience at the bungalow. She had been very unimpressed, hearing the whole story to him, fearing the consequence of the Tormain temper as applied to Burke. A violent quarrel between the two men could not, she reflected, and would only be fraught with unpleasant results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had run up earlier in the day to enquire if Jean had returned to Staple, or he might have fired off a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Once or twice an ejaculation of intense anger burst from him as he listened, but, beyond that he made little comment.

"And—that was all," wound up

Jean. "And anyway, Blaise"—a little anxiously—"it's over now, and I'm none the worse except for the acquisition of a little more worldly wisdom and a strained neck."

"Yes, it's over now," he said, standing looking down at her with a curious gleam in his eyes. "But that sort of thing doesn't happen twice. You'll have to marry me—do you hear?"

"Impersonally. 'You shall never run such a risk again. We'll get married at once!'"

And Jean with a quiver of amusement at the corners of her mouth, responded meekly:

"Yes, Blaise."

The next minute his arms were around her and their voices in the first supreme kiss of love at last acknowledged—of love given and returned.

There is no gauge by which those first moments when two who love confess that they are lovers may be measured. It is the golden, timeless span when "unborn tomorrow and dead yesterday" cease to hem us round about and only love, and love's ecstasy, remains.

To Blaise and Jean it might have been an hour—a commonplace period ticked off by the little silver clock upon the chimney-piece—or half a century before they came back to the recollection of things mundane. When they did, it was against the kindly grudge of humour.

Blaise laughed out suddenly and boyishly.

"It's preposterous," he exclaimed. "I quite forgot to propose."

"So you did! Suppose—smiling up at him imperceptibly—suppose you do not?"

"So you did! Suppose—smiling up at him imperceptibly—suppose you do not?"

Jean was silent, but her eyes answered for her. She had made room for him beside her, and now he was seated upon the edge of the Chesterfield, holding her in his arms. She did not want to talk much. That still, serene happiness which lies deep within the heart is not provocative of garbality.

"Ah, yes! A question—the question had tornmented her through all the long months since she had first realized without her was leading her, and he would try to let her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you had told about Nests—"

"Ah, yes! Don't talk about it, Blaise," she broke in hastily, sensing his distasteful recoil from the topic.

"I think we must be a little, dear," he responded gravely. "You see, Nests was not all to blame—nor even very much, as I'm sure—with a little half-tender smile—for my mother tried hard to make you believe."

Jean nodded vigorously.

"She did. And I expect she was perfectly right."

He shook his head.

"No," he answered. "The fault was really mine. My initial mistake was in not refusing the false fire with the true. It was not love I had for

Nests. And I found it out when it was too late. We were poles apart in everything, and instead of trying to make it easier for her, trying to understand her and to lead her into our ways of looking at things, I only stormer at her. It roused all that was worst in me to see her trailing our name in the dust, throwing her dignity to the winds, craving for nothing other than amusement and excitement. I'm not trying to excuse myself. There was no excuse for me. In any way, I was an impulsive and foolish as she. And when the crash came—when I found her deliberately entertaining in my house against my express orders, a man who ought to have been kicked out of any decent society, why, I let go. The Tormain temper had its way with me. I shall never forgive myself for that. I frightened her, terrified her. I think I must have been half mad. And then, you know what followed. She rushed away and, before anyone could find her or help her, she had killed herself—thrown herself into the Seine. Quite what happened between leaving her and her death we were never able to find out. Apparently since her marriage with me, her sister had gone to Paris, unknown to her, and had taken a situation as 'dame de compagnie' to some Frenchwoman, and Nests, though she followed from Italy to Paris, failed to find her there. At least that is what Margherita Vain told me in the letter announcing Nests's death. Then I must have felt heart. So you see, morally I am responsible for that poor, reckless child's death."

"Oh, no, no, Blaise! I don't see that at all pitifully."

"Don't you? I do—very clearly. And that was why, when I found myself caring for you, I tried to keep away."

He felt in his pocket and produced a plain gold wedding-ring. On the inside were engraved the initials "B. T. and N. F.," and a date.

"That was my talisman. Margherita sent it back to me when she wrote telling me of Nests's death. Whenever I felt my resolution weakening, I used to take it out and have a look at it. It always gave quite effective in thrusting me back into my proper place in the scheme of things—that is, outside any other woman's life."

There was an inexpressible lightness in his tones, and Jean drew a little nearer to him, her heart overflowing with compassion. He looked down at her and smiled a thought ironically.

"But now—you've beaten me!"

"My lips brushed her hair. I'm glad to be beaten, beloved. . . . I knew, that at Montevau, what you might come to mean to me."

"I intended never to see you again, but just to take that one day for remembrance. I felt that I had made room for him beside her, and now he was seated upon the edge of the Chesterfield, holding her in his arms. She did not want to talk much. That still, serene happiness which lies deep within the heart is not provocative of garbality."

"Ah, yes! A question—the question had tornmented her through all the long months since she had first realized without her was leading her, and he would try to let her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you had told about Nests—"

You said it?

it pays to
"ROLL
YOUR
OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again.

You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco.

And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15¢ and 25¢ packages
—also in 1/2 lb. —assum tins.

FREE Chanticleer Cigarette Papers with every package.

across the cornfield which formed part of a short cut between Staple and Charwood.

At first Jean had feared lest her new-found happiness might raise a barrier of sorts between herself and Claire. The contrast between the respective hands that Fate had dealt them was so glaring, and the rose and gold with which love had suddenly decked Jean's own life seemed to make the bleak tragedy which enveloped Claire's appear even darker than before.

But Claire's full, full of a quiet, unselfish rejoicing in the happiness which had fallen to the lot of her friend, had somehow smoothed away the little uncomfortable feeling of comparison which, to anyone as sensitive as Jean, had been a very real embarrassment. Nick's felicitations, too, had been tendered with frank cordiality and affection, and with delicate perception that had successfully concealed the sting of individual pain which the contrast could hardly fail to have induced.

So it was with a considerably lightened heart that Jean, with her escort of two, passed between the gates of Charwood and, avoiding the lengthy walk entailed by following the windings of the drive, struck across the velvet lawn—smooth stretches of close-cropped sward which, broken only by branching trees and shrubbery, and underfaced by the dreadful formality of symmetrical flower-beds, swept right up to the gravelled terrace facing the windows of the house itself.

The two men loitered to discuss the points of a couple of young spanglers' following together on the grass, but Jean, eager to see Claire, smilingly declined to wait for them, and, speeding on ahead, she mounted the short flight of steps leading to the terrace from the lower level of the lawn.

(To Be Continued.)

Build Huge Telescope

Second Largest Telescope in the World To Be Erected Near Toronto

Details of the erection near Richmond Hill, north of Toronto, of the second largest telescope in the world, at an estimated cost of \$500,000 has been made public.

Officials of the University of Toronto to which Mrs. Jessie Davis, donating the David Dunlop Observatory in memory of her husband, announced construction would start at once on the two main buildings of the plant.

On a circular platform 800 feet above sea level a round building 51 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion Government observatory, Victoria, B.C., the telescope will be on the reflecting type and will have mirrors weighing 5,000 pounds.

The telescope building and an administration building to be erected at a cost of \$125,000 will be located in the centre of a 177-acre plot, which will be known as the David Dunlop Park.

Counterfeit Coin

Spurious Fifty Cent Pieces Being Circulated At Coast

The 50 cent piece is in a fair way to pass out of use as legal tender in Vancouver until the flood of counterfeit coins of that denomination is stopped.

One large corporation is stated by police to have taken in more than \$100 worth of the spurious money while other firms report acceptance of sums ranging from \$80 to \$50. A number of persons detected circulating the coins have been questioned by police, but in each case it was bobby into a money-making industry, in spite of present economic difficulties. Ames makes small ships and boats there they can be sold. He will not reveal his secret of constructing the models in the bottle, but he is able to sell all he can build.

Within a short time, however, coins bearing the dates 1910, 1917, 1918, and of less clever design, appeared and have gained wide circulation.

Will Not Reveal Secret

J. D. Ames, retired marine engineer, of Houston, Texas, has been hobbied into a money-making industry, in spite of present economic difficulties. Ames makes small ships and boats there they can be sold. He will not reveal his secret of constructing the models in the bottle, but he is able to sell all he can build.

France has 800 manufacturers of agricultural implements, about twice as many as before the war.

Little Helps For This Week

"We then that are strong ought to bear the infirmities of the weak." — Romans xv. 1.

Ask God to give thee skill in comfort's art. That thou mayst consoled be, and rest apart. Unto a life of sympathy. For heavy is the weight of ill. In every heart: And comforters are needed much, Of Christ-like love.

Anna E. Hamilton.

They who have undergone and overcome stand with their keys to open the portals of life's great emergencies to the brethren. The wondrous power of experience! And see how beautiful and ennobling this makes our sorrows and temptations. Every stroke of sorrow that issues into light and joy is God putting into your hand the key of that sorrow, to unlock it for all the poor souls whom you may see approaching it through all your future life. It is a noble thing to take that key and use it.

—Phillips Brooks.

Perian Balm tones and stimulates the skin. Fragrant as a flower. Good as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates a complexion of exquisite charm. Adds a subtle finish to the faintest woman. Invaluable for softening the hands and making them ravishly white. Cool and refreshing. Delicately fragrant. Delightful to use. Cheap unobtrusively by all women who care for feminine distinction.

Things Not Needed

Rt. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German muskies, Chinese puzzles, Russian Reds, Spanish, French leave and Dutch treats.

Only two British women, of the 200 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Algers and France have just been connected by radio telephone.

"Buha," made from drink, has become the national drink of Libya.

Heat is Hard on Babies!

But Mothers Find Protection and Relief for Them in BABY'S OWN TABLETS

"When my children are overheat and restless in warm weather, I give them just one of BABY'S OWN TABLETS at night, and in the morning they are happy and contented with me. I give pleasure to my wife," writes Mrs. Mary Mason, Halifax, N.S.

Mr. George H. Walker, "Thorn-hill, Ont.," says: "I have found BABY'S OWN TABLETS the best of all children's remedies for Summer complaints, Colds, Teething and Constipation."

"BABY'S OWN TABLETS are excellent for children's summer complaints," writes Mrs. (Rev.) Conna, Bradford, Ont.

BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analysis statement in each 25c package. They are recommended for Summer illnesses, teething troubles, simple fever, colic, upset stomach, constipation, sleeplessness and fretfulness. Children take them in large quantities if they eat candy. More than 1,250,000 packages sold in 1931.

About Town and Country

Alex. H. McTavish, R.O. Sight Specialist, will visit hotel, Oyen, on Thursday, Sept. 1. Eyes examined, glasses fitted and repaired in dependable manner.

Mr. G. P. Freebury returned home from Cereal the latter part of last week and is making satisfactory progress after his operation.

Mrs. T. M. Nunn and son Stanley, who have been spending a vacation at the coast, returned to Oyen last Sunday.

Vic Thygesen returned home from Calgary last Sunday.

Miss A. Hendell, who was the week-end guest of Miss Catharine Wright, returned to Excel for a few days, last Tuesday. She will be Miss Wright's guest again this coming week.

Mrs. A. J. Funnell and family moved last Sunday to Carolside where her husband is grain buyer for the Wheat Pool.

Mrs. Howarth, who has been the guest of her sister Mrs. C. P. Snyder, returned to her home in Delta, Tuesday.

In the absence of Mr. Geo. D. MacMillan at the coast on a vacation, Mr. E. D. Pfeiffer is relieving agent at Excel depot.

On the first Sunday in September (Sept. 4), Rev. E. F. Kemp, and Mr. Otto Rolles will exchange pulpits. Mr. Rolles will preach at Hudson Heights at 11:00 a.m., Glenada at 3 p.m. and Oyen at 7:30 p.m. Rev. Kemp will preach at Spring Valley at 11 a.m., a combined Bonnie Brice and Stoney Slope service at Stoney Slope at 2:30 p.m. and at Acadia Valley at 7:45 p.m.

Mr. Thos. Lees motored to Calgary this morning accompanied by Mr. and Mrs. Chas. Stewart and the Misses Lucille and Minetta Charbonneau.

Miss Isobel Lannon of Drumheller is a guest at the home of Mrs. W. F. Pratt.

Dr. J. P. Kerr, who has been seriously indisposed for the last week is confined to his home with flu and tonsillitis.

Shortly after 8 a.m. this morning smoke was seen rising from the roof of Dr. Dick's premises on First avenue, and a fire alarm was turned in. While the chemical engine was being rushed over, it was discovered that the doctor was burning some rubbish in his yard and the smoke from the small fire he had made, curling over the roof of his office, made it appear as if his building was on fire.

**Prize Winners at

**DIFFERENCE IN COST ONLY
1¢ PER DAY
FOR FAMILY OF FOUR**

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1¢ PER DAY FOR A FAMILY OF FOUR. Is the saving worth what it costs you in health risk, questionable purity, unappetizing flavor and poor food value?
